How videos can be added to Moodle?

YouTube videos hint:

Please note that for privacy reasons YouTube videos can only be added via a link in Moodle. A direct upload in the course interface is not possible!

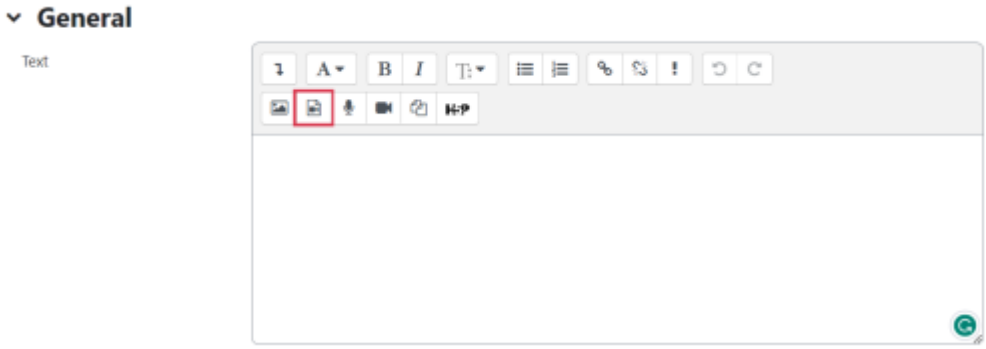

Adding Videos:

Videos up to 256 MB can be uploaded directly to Moodle. For larger files, „video hosting“ is a better way.

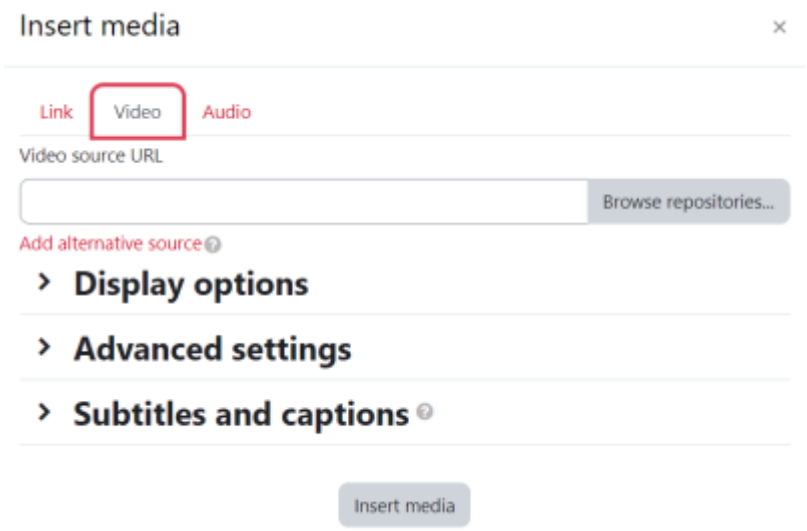

You can also link to the web address of externally hosted videos, e.g. via the „Link/URL“. Do you already know the TIB AV-Portal for scientific films or the portal for open educational materials „twillo“ (funded by MWK)?

Upload videos up to 256 MB directly to Moodle:

1. In edit mode: Click on „**Add an activity or resource**“ and select „**Text and media area**“.
2. Hover and click on the Insert or edit audio/video file icon.

3. Switch to the „**Video**“ tab, browse and select the locally saved video file with „**Choose file**“.
4. Finish with „**Insert media**“ and „**Save and return to course**“.

If the size of the upload is limited, check the settings in the Moodle course: „**Files and uploads - maximum file size**“.

Videos >256 MB:

You can add videos with a size of 256MB or more via video hosting to Moodle.

Linking external videos in Moodle:

Videos from external video platforms can be added to Moodle via the web addresses (URL).

1. In edit mode: Click on „**Add an activity or resource**“ and select „**Text and media area**“.
2. Hover and click on the „**Insert or edit audio/video file**“ icon.
3. Switch to the „**Video**“ tab and paste the copied URL.
4. Finish with „**Insert media**“ and „**Save and return to course**“.

Add YouTube videos in Moodle:

This feature is currently not available.

Add YouTube videos in YouTube advance copyright mode.

1. Open a text area.
2. Activate HTML-Mode with the „**</>**“ icon.
3. On YouTube, copy the „**Insert code for copyright mode:**“ „**Share**“, then „**Insert**“. Active the „**Enable advanced copyright**“ option.
4. Paste in the text area and „**Save changes**“.
