

# Create Activities

The actual content elements in Moodle course rooms are called „Activities“ or „Resources“. This is where instructors provide content and individual or group activities, e.g. PDF, assignments, forums, etc. Here in the wiki under „[Course activities](#)“ you will find a list of these.

## Switch on edit mode

To edit your course room, switch on the edit mode in the upper right corner of the course room.

## Add activities

1. Click on „**Add an activity or resource**“, a dialog box opens.
2. Customize the settings as desired.
3. „**Save and return to course**“.

## Content change notification

How do students learn about changes to the course materials?

1. In the settings of activities, activate the option „**Send content change notification**“.
2. „**Save and return to course**“.
