Book

A Moodle „**Book**" ☐ can present multi-page learning content in a book-like format.

Web pages that have already been created can be imported directly into a book. Books can be printed as a whole or chapter by chapter. A book can consist of chapters and subchapters. However, a subchapter cannot be divided into further subchapters.

A book is a static work material that does not allow interactivity. However, you can link from the book to a „Choice" or to a „Forum".

To learn how to create a „**Book**" in Moodle, see the official Moodle documentation at moodle.org.
