Chat

In the activity ⧠ **Chat** course participants can discuss with each other in real time online in Moodle, exchange opinions and different perspectives.

In contrast to the forums, the exchange here takes place simultaneously, i.e. synchronously. The chat module contains a number of functions to manage and follow up on the discussions.

- Configure chat
  Here you will find information on how to create a chat in the course and what settings you can configure for a chat.

- Using Chat
  Information on how to use a chat in Moodle and which usage scenarios are possible.

- FAQ about the learning activity Chat
