2025/11/27 23:22 1/1 SCORM package

## **SCORM** package

A SCORM package is an activity in moodle that allows externally created SCORM packages (learning units) to be incorporated into Moodle. SCORM (Sharable Content Object Reference Model) is a reference model for reusable electronic learning content that includes standards and specifications to deliver web-based learning content across multiple platforms.

See moodle.org for more information on this feature.
