2025/11/27 23:22 1/1 SCORM package

SCORM package

A "**SCROM package**" is an activity in Moodle that makes it possible to integrate externally created SCORM packages (learning units) into Moodle. SCORM (Sharable Content Object Reference Model) is a reference model for reusable electronic learning content that includes standards and specifications for making web-based learning content available on various platforms.

See moodle.org for more information on this feature.
