

# Student folder

With the “**Student folder**” activity, teachers can now create a special directory in Moodle. Students can upload documents there themselves and make them visible to all course participants. If required, a release can be set up by teachers.

The “**Take documents from an assignment**” mode allows documents from the “**Assignment**” activity (in the same course) to be shared. Sharing by students can be set up.

Detailed instructions and helpful videos are provided by the Academic Moodle Cooperation (AMC): [Student Folder](#)
