

Text and media area

The „**Text and media area**“ activity allows you to insert text (e.g. headings), images, multimedia or code directly on the course page between other resources.

It is a versatile working material that can be used, for example, to provide brief information or to describe what the course participants should do next. It can also be used to better structure the content of a course section and make it clearer, e.g. to insert blank lines or separators between work materials or learning activities.

The screenshot displays a Moodle course page with several activity blocks. The 'Text and media area' activity is highlighted in red. It contains the text: 'This is a text area: Here you can insert text (e.g. headings), images, multimedia or code directly on the course page between other resources.' Below the text is a rich text editor toolbar with icons for bold, italic, underline, strikethrough, link, unlink, list, and media. At the bottom of the activity block is a red button with a plus sign and the text 'Add an activity or resource'.

Further information on text and media area can be found on moodle.org.

You can find instructions on how to insert images on moodle.org.
