

# Text and media area

The „**Text and media area**“ activity allows you to insert text (e.g. headings), images, multimedia or code directly on the course page between other resources.

It is a versatile working material that can be used, for example, to provide brief information or to describe what the course participants should do next. It can also be used to better structure the content of a course section and make it clearer, e.g. to insert blank lines or separators between work materials or learning activities.

The screenshot displays a Moodle course page with a list of activities on the left and a main content area. The activities listed are: FOLDER (Testify), FORUM (Test), FAIR ALLOCATION (Test), and SCHEDULER (Test). The main content area is titled 'This is a text area:' and contains the text: 'Here you can insert text (e.g. headings), images, multimedia or code directly on the course page between other resources.' Below this text is a toolbar with icons for inserting images, links, text, code, and other elements. At the bottom of the main content area is a red button labeled '+ Add an activity or resource'.

Further information on text and media area can be found at [moodle.org](https://moodle.org).

You can find instructions on how to insert images at [moodle.org](https://moodle.org).
