

Text and media area

The „**Text and media area**“ activity allows you to insert text (e.g. headings), images, multimedia or code directly on the course page between other resources.

It is a versatile working material that can be used, for example, to provide brief information or to describe what the course participants should do next. It can also be used to better structure the content of a course section and make it clearer, e.g. to insert blank lines or separators between work materials or learning activities.

The screenshot shows the Moodle 'Text and media area' activity editor. It features a list of activity types on the left: FOLDER (Testify), FORUM (Test), FAIR ALLOCATION (Test), and SCHEDULER (Test). Below these is a text area with the placeholder text 'This is a text area:' and a description: 'Here you can insert text (e.g. headings), images, multimedia or code directly on the course page between other resources.' A toolbar with icons for text, image, link, list, table, and code is visible. At the bottom, there is a red button labeled 'Add an activity or resource'.

Further information on text and media area can be found at moodle.org.

You can find instructions on how to insert images at moodle.org.
