

Delete course room

Course rooms can be marked for deletion.

Courses with three „xxx“ prefixes in their names are regularly deleted from the system. Course backups will also be deleted.

Please back up work results and assignments beforehand if needed: [result_backup](#) - [save student work decentralized](#).

Hide your course room first, it will only be visible to enrolled „Teachers“ and Managers (Hide course room).\ Add the string „xxx“ in the course name, e.g. „xxx_course_name WiSe20/lecturer“. Save the change.
