

# Appearance

You have the possibility to make some basic settings for the presentation of your course:

## ▼ Darstellung

Design festlegen		Nicht festlegen ⇅
Sprache erzwingen		Nicht festlegen ⇅
Anzahl von Ankündigungen	?	2 ⇅
Bewertungen anzeigen	?	Ja ⇅
Aktivitätsberichte	?	Nein ⇅

## Theme

The theme refers to the pre-installed „theme“ that will be used for the course. By default, the theme **Boost Campus** is set- we recommend not to change this setting, as it corresponds to the corporate design of Jade University.

## Force language

If you specify a language here, the Moodle interface in the course will appear in that language, even if users have selected a different preferred language in their user profile.

## Number of announcements

This setting determines how many new messages from the Announcements forum are displayed in the **New Announcements** block on the course page. More information: [Number of Announcements](#).

## Show ratings

Use this setting to determine whether students see an „Assessments“ link in the navigation block. If you do not use assessments in your course, it is a good idea to disable this setting. If you are using assessments and the setting is disabled, students can still access their associated assessment through the individual activities.
