

# Course visibility

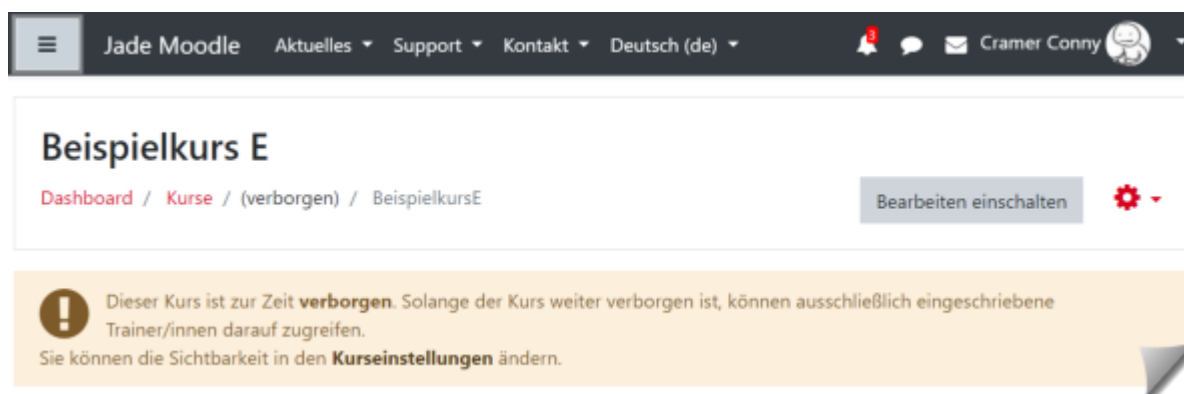

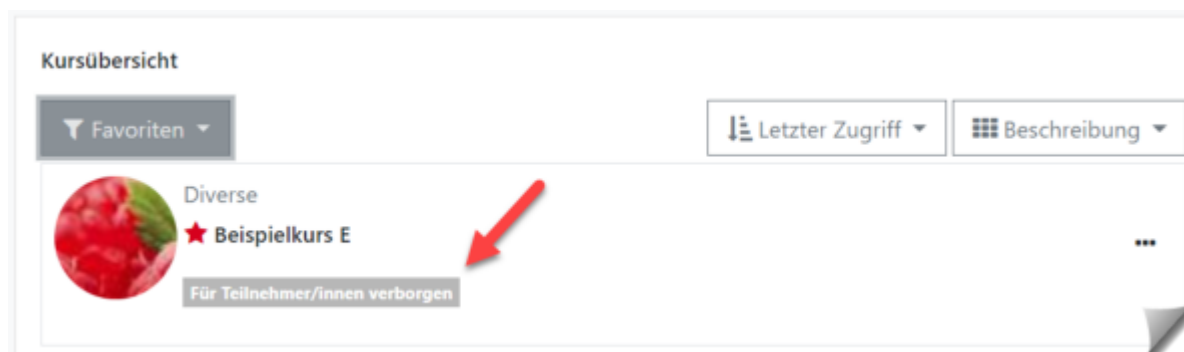

Teachers (role “Teacher”) can temporarily hide course rooms from students.

This can be useful, for example, to revise courses at your leisure. Hidden course rooms receive the note “Hidden for students” in your course overview on the dashboard. A note is also displayed in the course room (see images below).

## Instructions:

1. Click the **cogwheel** in the upper right corner (the Settings menu will open) and select “Edit Settings”: Edit Course Settings overview will be displayed.
2. **Edit Settings:** Course Visibility: **Select “Hide “** (or **“Show “** to show the course again).
3. Confirm changes with the button “Save and show”.
