

# Completion tracking

## Set up activity completion

Define when an activity or material should be considered completed.

Activity completion can show learners their learning progress. As a teacher, you can make the completion of certain activities a prerequisite for viewing further materials or activities.

**Activate completion tracking: Course Settings**, section **Completion Tracking**. Now you can define how the completion of an activity or material is determined. See [moodle.org](https://moodle.org) for more information: [Activity completion settings](#).

The screenshot shows the 'Completion tracking' section of the Moodle Course Settings. It has a red title 'Completion tracking' with a dropdown arrow. Below it are two settings, each with a question mark icon and a 'Yes' button with a dropdown arrow.

Setting	Value
Enable completion tracking	Yes
Show activity completion conditions	Yes
