

Course display

You have the possibility to make some basic settings for the presentation of your course:

▼ Darstellung

Design festlegen	<input type="button" value="Nicht festlegen"/>
Sprache erzwingen	<input type="button" value="Nicht festlegen"/>
Anzahl von Ankündigungen	<input type="button" value="2"/>
Bewertungen anzeigen	<input type="button" value="Ja"/>
Aktivitätsberichte	<input type="button" value="Nein"/>

Design

The theme refers to the pre-installed „theme“ that will be used for the course. By default, the theme **Boost Campus** is set- we recommend not to change this setting, as it corresponds to the corporate design of Jade University.

Bewertungen anzeigen	<input type="button" value="Ja"/>
Aktivitätsberichte	<input type="button" value="Nein"/>

Force language

If you specify a language here, the Moodle interface in the course will appear in that language, even if users have selected a different preferred language in their user profile.

Number of announcements

This setting determines how many new messages from the Announcements forum are displayed in the **New Announcements** block on the course page. More information: [Number of Announcements](#).

Show ratings

Use this setting to determine whether students see an „Assessments“ link in the navigation block. If you do not use assessments in your course, it is a good idea to disable this setting. If you are using assessments and the setting is disabled, students can still access their associated assessment through the individual activities.
