Course visibility

Teachers (role „Teacher“) can temporarily hide course rooms from students.

.

This can be useful, for example, to revise courses at your leisure. Hidden course rooms receive the note „Hidden for students“ in your course overview on the dashboard. A note is also displayed in the course room (see images below).

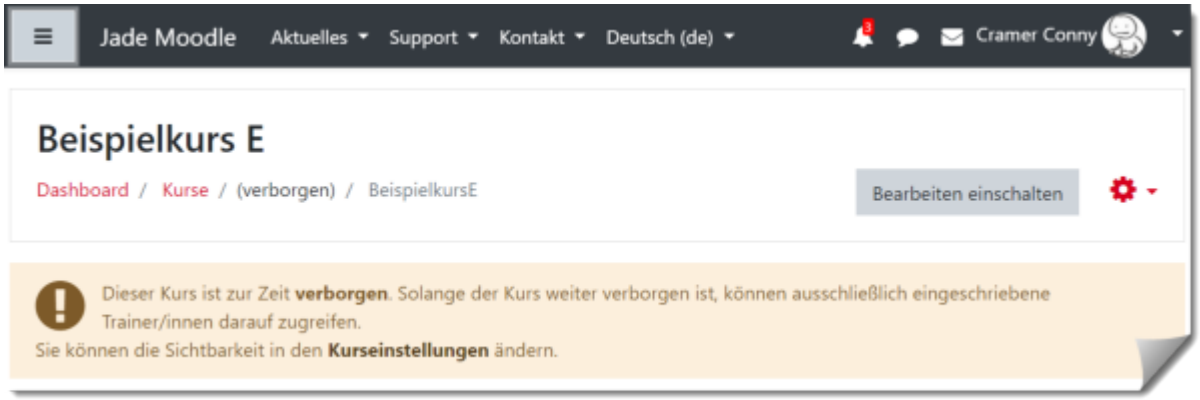

Instructions:

1. Click the **cogwheel** in the upper right corner (the Settings menu will open) and select „Edit Settings“: Edit Course Settings overview will be displayed.

2. **Edit Settings**: Course Visibility: **Select „Hide „** (or **„Show „** to show the course again).

3. Confirm changes with the button „Save and show“.
