

# Import/Export questions

Test questions are organized in the [Question bank](#) of a course. Teachers can [Export](#) questions and then [Import](#) questions into the “**Question bank**” of another course. The “Moodle XML format” is well suited.

## Application examples

- Prepare questions and insert them into the test of an exam course
- Export questions from an existing test and import as a copy into a new test (and change if necessary)
- Pass questions on to interested colleagues

## Video

- Simply transfer questions to other courses? - Moodle 3.3 - [Youtube](#) (in German).
