Import/Export questions

Test questions are organized in the Question bank of a course. Teachers can Export questions and then Import questions into the „**Question bank**" of another course. The „Moodle XML format" is well suited.

Application examples

- Prepare questions and insert them into the test of an exam course
- Export questions from an existing test and import as a copy into a new test (and change if necessary)
- Pass questions on to interested colleagues

Video

- Simply transfer questions to other courses? - Moodle 3.3 - Youtube (in German).
