Test

> ⚠️ **Note:** Before electronic examinations, students must be informed that they may only participate from a desktop PC or notebook. There may be problems with file submission via the app!

Tests in Moodle support the self-learning phase of students. Different question types are possible:

- Single and multiple choice questions
- Cloze questions
- Drag-and-drop tasks
- Questions that require calculated answers.

Students can get immediate feedback in quiz mode or receive a later evaluation in exam mode.

Setting up tests is done in two steps:

1. Test set up and configure
2. Create and compile test questions

Set up and configure

1. In edit mode: **Select Create Material or Activity** and add a **Test**.
2. **Configure** the **Test** activity.

Depending on the planned setting (from self-test to e-exam), very different settings are possible. The settings for a simple self-test are described below; unless otherwise described, the default settings are used.

- *Name **(mandatory field) Enter name, appears on the course page. * Description Enter information for students, e.g. what type of test scenario it is. * Time No changes (no time limit). *** Scoring **No changes (best attempt will be scored). *** Question order **No changes (students may navigate freely between questions). *** Question behaviour **Formative self-monitoring: Students can have their answers checked immediately and receive feedback on their answers. Questions can be answered multiple times. *** Question behaviour: „Multiple answer (with hints)". * Allow re-working in an attempt: „Students are allowed to repeat other versions of completed questions". * Each attempt is based on the previous one: „Yes". *** Review options**. Set all crosses except for „Correct answer". *** Overall feedback **After answering all questions, feedback on the test as a whole can be deposited depending on the score achieved.** Save settings** with „Save and display". Test questions can then be created.

Further materials on tests

For more information on configuring test scenarios and details on the available question types, please

refer to the general Moodle documentation:

- Quick guide to tests (moodle.org)
- Moodle Kursraum Tests and their questioning behaviour
- Question types (moodle.org)
- Random questions (moodle.org)

Moodlesupport offers workshops on Anfrage workshops on the topic, please feel free to contact us!
