

# TaskCards

TaskCards is an online platform that allows teachers and students to work collaboratively.

They can create pinboards and publish the so-called TaskCards on those pinboards. A TaskCard can consist of texts, images, links and various file attachments. The pinboards are private or can be made publicly accessible via a link.

The TaskCards platform is developed and operated by the German company dSign Systems GmbH. The servers for taskcards.de are located exclusively in Germany. TaskCards is compliant with the DSGVO.

## Get Access

Jade University of Applied Sciences has purchased a limited number of licences for teaching purposes. Request your licence by sending an email to [digitale-lehre@jade-hs.de](mailto:digitale-lehre@jade-hs.de).

Now you can log in to TaskCards at <https://jade-hs.taskcards.app>.

## Manual and Support
