Schedule planner (DFN)

Scheduling appointments made easy - and data protection compliant

Application scenario: Web-based coordination (e.g. appointments)
Runtime: Unlimited
License: All members of the Jade University
Contact: DFN (after login)

The DFN appointment scheduler enables web-based coordination, e.g. for appointments. DFN-Verein provides the scheduler exclusively for polls initiated by users from institutions participating in DFN. Under data protection law, the scheduler is designed for simple polls, but not for large-scale polls and expressly not for the entry of sensitive personal data (more on this at DFN).
