DFNconf

With the DFNconf service, video conferences can be held easily, securely and in high image and audio quality. Access is possible with video conferencing systems (e.g. SIP, Skype Business) and also web-based or via app (Pexip) (up to 23 participants).

A meeting via DFNconf can be recorded (also conference with yourself). A meeting can be streamed, i.e. an unlimited number of participants can watch.

- Information and access to the service - www.conf.dfn.de (in German).
- Organizer login with DFN-AAI (HS access data) - www.my.conf.dfn.de.
- Testcall to meeting rooms and system check.
- Notes on Recording and streaming (in German).
