

Polls

Requirements

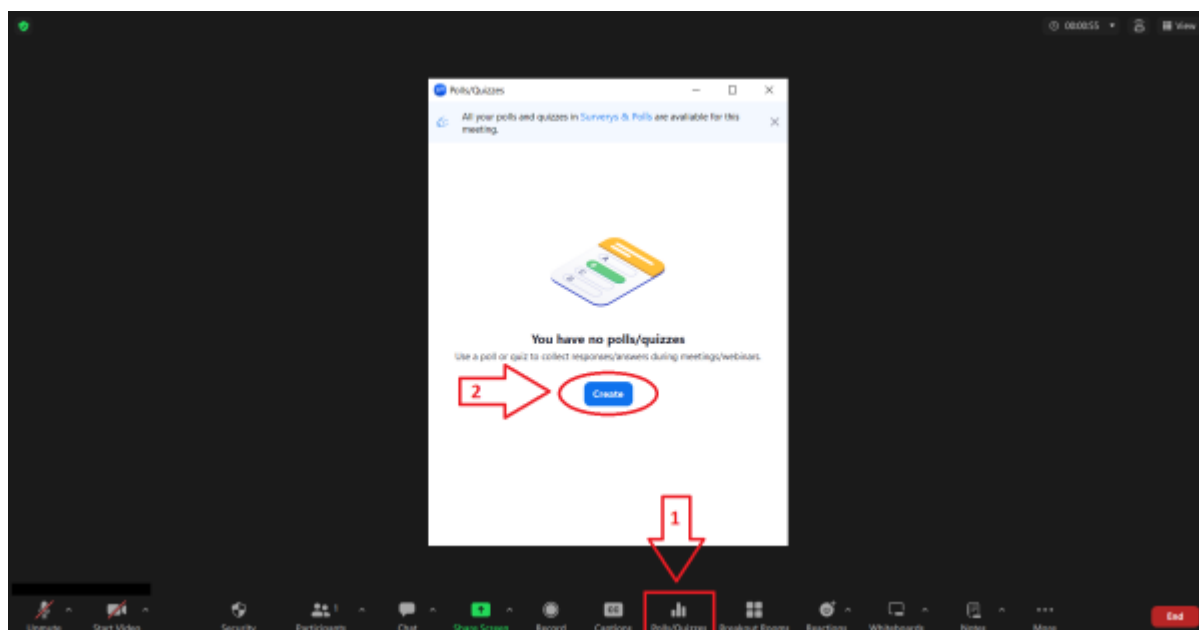

- Licensed use (set up or start meeting in Moodle)
- Current browser or current desktop client (mere participation also possible with the mobile app)
- The meeting must be either a scheduled meeting or an instant meeting for which you use your personal meeting ID

Note: Users of the iOS or Android mobile app can participate in „**Polls**“, but hosts must use the desktop client to manage them.

See also [Polls in meetings](#) (Zoom, 28.10.2023)

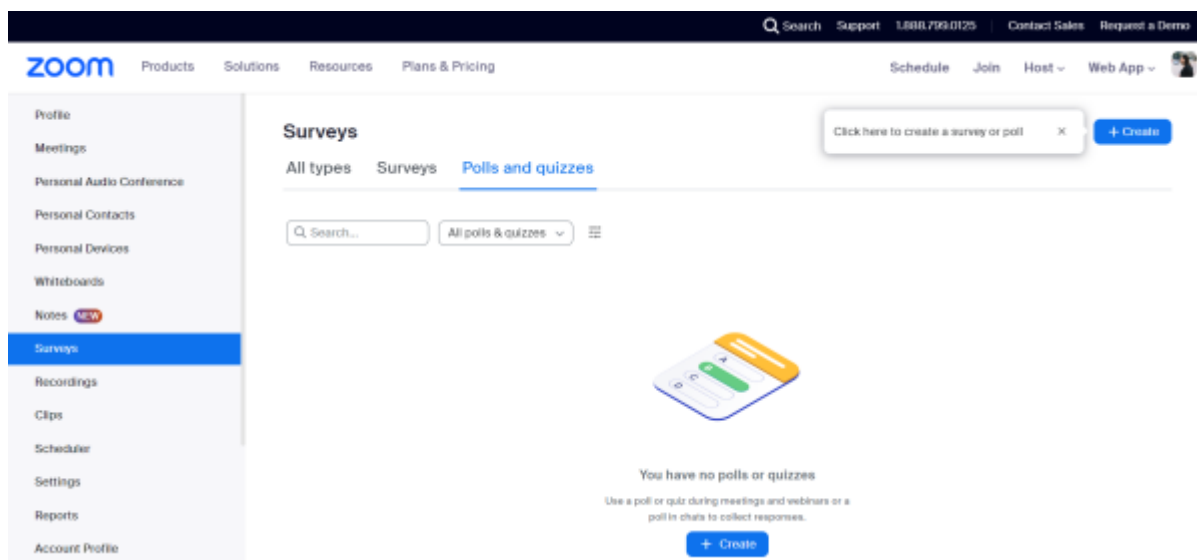

Creating a poll in the meeting

1. Start the meeting.
2. In Full-Screen mode, click on „**Polls/Quizzes**“ in the menu bar at the bottom and then create your polls.

Alternative: Prepare a poll in the portal

1. Go to your Zoom portal on the web page.
2. Click on the „**Surveys**“ in the left side menu.
3. Polls can be created or edited in the „**Polls and quizzes**“ section.

Extended polls and quiz functions

The meeting poll feature allows you to create polls with single or multiple choice questions. Advanced polls also offer questions with matching answers, rankings, short answers and long answers. You can also set the correct answers to turn the poll into a quiz. You can find more information about this on the [Zoom](#) support page.
